FEED THE MIND, NOURISH THE BODY - The botanical garden of Zeranta for the National Etruscan Museum

Zeranta Edutainment, in collaboration with the Technical Agrarian Institutes and Professional Institutes for Agriculture, has designed a project that aims to create a botanical garden in Zeranta, a town in the heart of the Etruscan civilization.

A full immersion in the roots of the past to enhance the traditions that for thousands of years have nourished the Etruscan people.

The extreme historical fidelity of the proposed spaces creates a striking encounter between archeology and nature.

The visits to the exhibition areas of the vegetable garden, the Etruscan garden and the Greek, Etruscan and Roman gardens.

Excellence, innovation, orientation and research come together with the magic of green reconstructions, creating a unique and unforgettable experience.
